

s-fix ACCESSORIES

Price List Summer 2016

Introduction

S-FIX is a growing range of precision 3D Scanning and Portable CMM accessories. It is designed and manufactured in-house by experienced everyday users. The range provides a real breakthrough in offering application specific, quality and affordable components.

All products have been designed and tested around the principles of offering additional accessibility both above and below a component, while countering the added forces acquired when using a CMM by hand.

The S-FIX range includes a variety of different tripods and mounting options; a series of fixturing tables; an ever-expanding fixturing and hold down system; a line of probes for portable CMM's and various leapfrog options.

Please see our website at www.s-fix.co.uk, e-mail us at info@s-can.co.uk or phone us on 01953 798089 for purchases and further product information.
